

MEMO TO FILE

On Monday May 20, 1988, I received a call from Avis Porter(883-2827) regarding the rainbow she saw on top of the street runoff on Greenwood between National and Kings. Gene Pabst and I went to that location to investigate. We could see an oily sheen on top of the storm water that was flowing by the curb. There was also a rainbow on the cement of the curb. We followed it to the ridgeline in the middle of Greenwood and it disappeared. We could detect a faint odor of diesel. We checked the storm ditch that the street drained into. There was a slight oily sheen on top of the water in the ditch for a short distance, then it disappeared. We concluded that a truck, possible a trash truck, lost a little diesel fuel in the street. I called Mrs. Porter back in the afternoon and told her what we had found.
